INSTRUMENTUM GROUP

TOP-NOTCH INDUSTRIAL EQUIPMENT SUPPLIER

*Process Measuring, Control &
Calibration Instruments*

- Competitive Pricing
- Efficient Sourcing
- Widest Product Range
- Fast and Best in Time Delivery

we're able to continually deliver a world-class blend of insight, guidance and practical assistance.

OVERVIEW

Instrumentum Group was established in 2014 by experienced engineers and experienced sales teams with various industries background that includes process instrumentation & Control, valves, pipe & fittings, warehouse solutions, renewable energy, medical devices, commodities and supplies chain management. We aimed to maintain long-term commercial relationships with our customers, who value our reputation and market knowledge. Integrity is the first and foremost criteria that form the basis of our business at Instrumentum. We have a strong commitment to meet our customer needs and application while promoting business practices that respect our employees, our customers, our suppliers and the environment.

Instrumentum group is capable of delivering wide range of solutions for our customers under one window. We work with the best niche manufacturer's to provide quality products with economical prices and expedited delivery, by which customer can fulfill their requirement on time. We are prepared to assist customer in every inquiry whether it's for single equipment or a large project that requires multiple services. Not only we can provide equipment, but also we have the capability to provide the technical consultation on selecting the right equipment and efficient design.

Best Quality Service...

Our professional team is enthusiastic to provide the highest quality of services in this very competitive industry. We maintain high international standards to fulfil the requirement of all our customer needs around the globe. Our main objective is to utilize our sales, technical & sourcing experts to select and source the customer's requirement from our principals or manufacturer to fulfill their application with quality products at economical prices on defined lead time.

Highlights of our Services

Process Measuring/Control/Calibration
 Instruments Valves, Actuators, Pipe & Fittings
 Design control and measuring process loop
 Design total logistic solution system
 Warehouse Racking and MHE's

Renewable Energy & Explosive LED
 Medical Devices
 Build & Design Customized Process
 Equipment
 Marketing & Display Product.

Our logistics team can swiftly arrange to deliver spare parts or equipment with fast delivery around the world.

Petrochemical
Power Generation
Oil & Gas
FERTILIZER Precision
Engineering
Pharmaceutical **NUCLEAR**

HIGH QUALITY PROCESS & CALIBRATION INSTRUMENTS

We can supply high quality instruments for a wide range of applications and processes. Whether you need a special or a custom product, we have the product range and expertise to provide the perfect instrument to suit your individual requirements.

Pressure

Digital Pressure Gauge
High Pressure Gauges
Low Pressure Gauges
Differential Pressure Gauges
Industrial Pressure Gauges
Process Gauges
Harsh Environment Gauges
Low Cost Utility Gauges
Smart Pressure Transmitters
Differential Pressure Transmitter
Digital Pressure calibrator
Dead weight Testers & comparator

Temperature

Thermometers
Thermowells
Filled System Thermometers
Gas, Vapor, or Mercury
Glass Thermometer
Temperature Switches
Thermocouples & RTDS
Temperature Transmitters
Dry Bath Temperature Calibrator
Liquid Calibrator
Water Bath
Signal Calibrator & Simulator

Level

Point Level Switch
Multi-Point Level Switch
Continuous Mechanical Level Gauge
Ultrasonic Continuous Level Measuring System
Level Transmitter

Flow

Electro Magnetic Flow meters
Vortex Flow Meter
Mass Flow Meter & Controllers
Thermal Mass Flow Meters
Oval Gear Meters
Variable Area Flow Meters
Portable Ultrasonic Flow Meter
Flow Computers
Flow Controller and Recorder
Flow Calibrator

Recorders

Circular Chart Recorders
Z fold chart recorder
Paperless recorders
Chart Papers & -
Pens for all types of recorder

Industrial Automation

Sensing Components
Switches
Safety Components
Relays
Control Components
Power Supplies
Programmable Logic Controllers
PID Controller
Human Machine Interface
Components of a -
Telecommunication System
