

RackPro

HIGHLY VISIBLE UPRIGHT PROTECTOR

INSTRUMENTUM GROUP

RackPro

RackPro is a cost effective, easy to install protector for pallet racking uprights against expensive and potentially life threatening structural damage. It is a highly visible upright protector with an innovative design that has been drawn from the requirements of FEM 10.2.02 for impact loads and protection for pallet upright racking.

FEM 10.2.02 draws the distinction between protection for uprights at the end of racks between cross aisles and gangway intersections which require protection from any direction as compared with intermediate uprights that require protection in a direction normal to the aisle.

FEATURES

- *Very Tough, impact resistant, and round outer shell*
- *Resilient inner shock absorbing pad*
- *Simple clipping system to ensure fast installation at low cost*
- *Flexible, strong and very easy to remove*
- *500 mm high standard height*
- *Outer shell and absorbing pad stable down to -30°C*
- *Does not require to fix to the floor*
- *The slim fit design means there is absolute minimum bay and aisle intrusion so as not to reduce any safe working clearances*

FITS ALL MAJOR PALLET RACKING TYPES

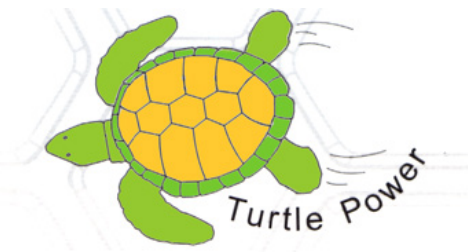

MODEL NO.	DESCRIPTION	COLOUR	STD. PACK
RPA	RackPro Upright Protector - For Rack Uprights from 70mm To 83mm width	Yellow	24

RPF	RackPro Upright Protector - For Rack Uprights from 129mm To 142mm width	Yellow	12

Why Choose RackPro?

A safe, organized, efficient warehouse is a key to an effective operation. It is important to pay close attention to safety in the warehouse. RackPro is one of the largest investments a company can make to prevent damage to pallet racking from forklift trucks and other material handling equipment, which can lead to accidents and expensive repairs.

DURABLE

Tough polyethylene rounded outer shell designed to deflect impact, and Resilient inner rubber shock absorber to spread the impact load.

EASY INSTALLATION

RackPro is really simple to install by one person, without tools. No need to drill into the floor or the rack upright to make this protection product work properly.

HIHGLY VISIBLE

High fluorescent colour gives operators notice of frame locations and thereby reduces probability of impact.

RACKPRO ACCESSORIES

Model No.					
Description	<i>RackPro Clip 32mm Center</i>	<i>RackPro Clip 38mm Center</i>	<i>RackPro Clip 46mm Center</i>	<i>RackPro Clip 47mm Center</i>	<i>RackPro Clip 53mm Center</i>
